“*Focusing on the Future*”

Ribbon Cutting Ceremony Held for The Sustainability Park™

‘*Focusing on the future*’ was the phrase of the day as leaders from businesses and governmental organizations from Chesterfield County, Virginia and across the state came together to celebrate at the official ribbon cutting ceremony of the Sustainability Park™, Monday, November 27th, 2006.

“This is a momentous occasion for the Park,” said Brenda Robinson, founder. “Cutting the ribbon may be considered purely ceremonial for some, but for the Park, it means that we have achieved one phase of our goals and are keeping our focus on the getting to the next stage and beyond. The ribbon cutting gave The Sustainability Park™ its official stamp on Virginia’s environment, economy, and social equity.”

Among those in attendance were representatives from Chesterfield County, the Virginia Department of Environmental Quality, the Virginia Economic Development Partnership, Friends of the River, the Virginia Manufacturer’s Association, DuPont, GVA Advantis, and family and friends.

Guests were treated to refreshments and remarks by Lane Ramsey, Chesterfield County Administrator, Brett Vassey, President of the Virginia Manufacturers Association and James Golden, Deputy Director for the Virginia Department of Environmental Quality, as well as, R. M. “Dickie” King, Jr., Chairman, Chesterfield County Board of Supervisors, and Bob Harrell, former Regional Director for the Virginia Center for Innovative Technology.

In addition, information about current Park tenants, Environmental Solutions, Inc., Talus Logistics, LLC, and Guardian Horse Bedding, was provided along with sample products on display.

The Sustainability Park™ goals are to provide new jobs, new technology, and new solutions – fostering innovation, hosting new generation manufacturing, securing joint venture partners, and introducing environmental technologies for widespread public and private sector use. Situated on 143 acres along the James River, The Sustainability Park™ offers tenants office space, laboratory space, warehouse space and manufacturing space in an industrial ecology park setting with easy access to major highways, as well as to ports, air, and rail. For additional information about the Park, visit www.thesustainabilitypark.com or contact Brenda Robinson, Founder, at 804.740.5605.
